

## How to make my Snowman

By: 20A

1. Make the background: hand draw a slight zigzagging 0066ff colored line across the page about 1/3 from the bottom of the page. The line you draw should be 15 line size.
2. Make the snowman: The snowman is made up of 3 balls stacked vertically. The balls are white *circles* with a black 1 line size. First make the bottom ball. The bottom ball has a 3 ¼ inch diameter. Place it in the middle so that it overlaps the background line by 2 inches.
3. Then make the middle ball. The middle ball is white and has a 2 inch diameter. Place it so it overlaps the bottom ball by a 1/2 inch.
4. Next make the top ball. It is white and has a 2 inch diameter. Place it so it overlaps the middle ball by a ½ inch.
5. Starting in the middle of the top ball, using the color ff6600, make a straight horizontal line going right that ends about a centimeter past the top ball. Start where you ended the first line and make a curved line that ends about ¼ inch below the start of the horizontal line. Connect what you just finished with the start of the horizontal line. Fill in the shape with the same orange you used to make the lines.
6. What you're doing now is making glasses for the snowman. Use 10 line size. Make an ff6600 horizontal line across the top circle about ¼ inch down from the top of the circle. Draw U shaped lines about ½ inches tall from the orange line. Make the Us about ¼ inches apart where the eyes would go. Next fill in the Us with black.
7. Now you're making a mouth. Using the color black, with 15 line size, make six dots in an upward curve. The snowman is smiling.
8. Now make an umbrella. Make a brown line tilted a little to the left using 10 line size. To draw the top of it, you should make a straight line tilting down on the left and up on the right about 4 inches long. The middle of the red line is on the top of the brown line. Make a curved line connecting the ends of the line. Fill the shape in with red.
9. Then make an arm for the snowman. The left arm is made by making a straight horizontal line coming out of the middle ball. Make the line start on the center of the edge on the left side of the ball. The line is 1 inch long, using the color 660000, and 5 line size. That arm has three fingers coming out from the end of the arm.
10. The snowman is wearing a sleeveless dress. Using the color ff00ff, and 10 line size, fill in the entire bottom ball, but leave ¾ an inch toward the bottom white. Fill in the bottom half of the middle ball with the color ff00ff. Make two vertical lines on the white half of the snowman's middle ball. Leave an opening for its neck. Make 17 yellow dots anywhere on the dress.
11. The snowman has a beach ball next to it. The ball is filled in yellow with yellow outline. Line size 1. The ball is a circle with a 2 inch diameter. Place it so it is on the ground and overlaps the snowman's bottom ball by 1 inch on the snowman's right side.
